

Aviation Education & Training

Good Experts are Educators

Educational Services

- Taught by Senior Accident Investigators
- Accredited by Major Universities
- Qualified for Continuing Education Credits

Short Courses

- Applied Aircraft Accident Investigation
- Human Factors in Aircraft Maintenance
- Drone Accident Investigation
- Failure Analysis
- Flight Path Reconstruction
- Pilot in Command Training

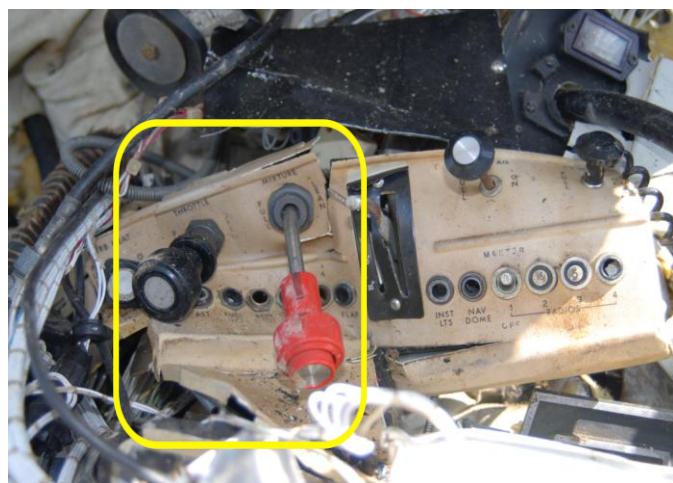

Aviation Accidents Explained

The Right Choice. DVI's Aviation Experts all have a passion for teaching and instructing. Our experts teach within the mainstream of aviation and have trained University Students, Pilots, Mechanics, FAA Inspectors, First Responders, Attorneys, Claims Adjusters, and Manufacturer Representatives.

"Learning is not attained by chance, it must be sought for with ardor and diligence."
—Abigail Adams

Comprehensive Training. Topics covered in DVI's workshops include: detailed and complex aircraft accident/wreckage reconstruction, flight path reconstruction, failure and fracture analysis, tribology, material science, material wear failures, radar and weather analysis, aircraft systems analysis, in-flight breakups, mid-air collisions, crashworthiness and survivability, witness interviews, in-flight and post-impact fires, and Human Factors (flight and maintenance).
