

# Aviation Industry Services

Solutions You Can Trust

## Affordable Services

- Product Development
- Patent Analysis
- Material Performance
- Tribology and Wear Testing
- Mechanical Testing
- In-Flight Data Collection
- FAA Certification Testing
- STC Development
- Finite Element Analysis
- Failure Analysis
- Crashworthiness Analysis
- Accident Investigation
- Safety Reviews
- Human Factors Studies

## Aviation Expertise

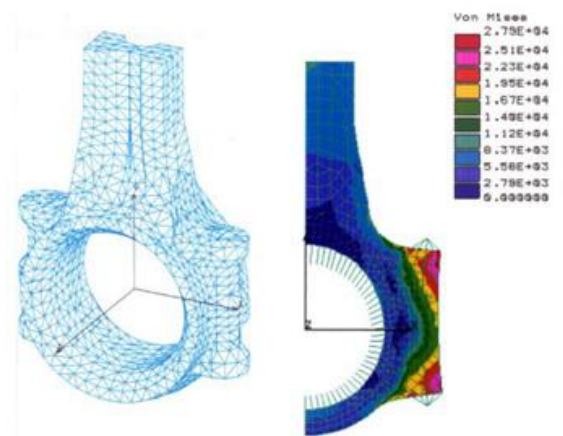

**Real Aviation Experience.** Our staff is a world-class team of aviation experts that brings practical and easily understood solutions to complex technical issues. Our industry credentials are irrefutable and range from pioneering scientific research, to professional piloting, to performing aircraft maintenance.

DVI has provided technical services to the Commercial, Business, and General Aviation industries. We can support global operations with our offices and research centers located in U.S, China, and Brazil.

**The Right Choice.** When you have critical decisions to make, DVI Aviation can help you gain the focus you need in all facets of the aviation industry.

DVI provides independent and unbiased analysis based upon the use of scientific methodologies.

DVI specializes in customized laboratory testing, instrumentation, and the evaluation of the effects of corrosion, wear, friction, temperature, and mechanical stresses on the properties and performance of materials.
